Mindgadget ONLY hires the experts and the best talent. Our recruitment process is intense so that our customers do not give us a chance to complain.

Mindgadget's clients and their customers benefit greatly from our broad, in-depth technical & business knowledge. We provide deeper technical & business coverage than typical companies, enabling us to solve more complex problems. Queries are answered faster because of the in-depth business & technical knowledge, further saving the client time and money.

Typically our people have the following skills:

### Soft Skills

- Engineers and Management Graduates with a very Positive “can-

do'' attitude.

- Top notch problem solving, analytical, inter-personal and oral/written communication skills
- High expertise on Application Management
- High flair for service & customer orientation
- Folks with high initiative and achievement motivation for technical support in a 24/7 culture.
- Folks who are highly satisfied by being extremely sensitive to customer problems and come up with quick and creative solutions.
- High level of expertise in business English language.
